

Registry Lock in CZ

Registration Operations Workshop #8

Jaromir Talir • jaromir.talir@nic.cz • 9. 5. 2019

Parameters

- Protection of registrant when registrar system get abused
 - Completely bypass registrar system
 - Direct channel with registrant is necessary – already existed for direct authinfo requests
- Registry sets/unsets ServerTransferProhibited (+ optionally ServerUpdateProhibited)
 - When set, registrar EPP transfer/update requests fail with 2304 - "Object status prohibits operation"
- Free of charge service

Channels

- 2008 – First version with web form for requests
 - Two ways of authorization
 - Print, Get notarized signature, Send via snail mail
 - Send request via e-mail with digital signature
 - Manual processing of requests on registry side
- 2013 – New channel via registrant portal
 - Authenticated access via mojID – authentication service with verified identities (identity is linked to contact in registry)

REQUESTS

FORM TO SEND THE PASSWORD REQUEST

This form sends [the request for a password required to change the sponsoring registrar](#) of an object in the registry (domains, contacts or name server set). Use the form in case you are not able to get this password directly from the current sponsoring registrar.

REQUEST FOR ENHANCED OBJECT SECURITY IN CZ.NIC DATABASE

With this form, you can request [to block the change of the sponsoring registrar](#) for a domain, contact, or a name server set, or you can [block the change](#) of a domain, contact, or a name server set.

Once the change of the sponsoring registrar is blocked, you cannot transfer the particular object to another registrar nor request the sending of a password needed for email changes in the central registry.

Once data changes are blocked, you cannot make any change to the data related to the particular object in the central registry. If you wish to cancel the blocking options above, please continue to the next paragraph.

REQUEST TO CANCEL THE ENHANCED OBJECT SECURITY IN CZ.NIC DATABASE

With this form, you can [cancel the blocking of the change of the sponsoring registrar](#) or [cancel the blocking of any change](#) of a domain, contact, or a name server set.

Send password | **Block** | Unblock | Personal data
